Objective

I am a AI and Data Science student with strong academic foundation willing to learn lot about software and I am seeking to contribute technical, analytical, problem solving skills in a dynamic organization that values innovation, continuous learning, collaborative growth .

Education

B.tech-Artificial Intelligence and Data Science

V.S.B College of Engineering and Technical Campus, Coimbatore.

CGPA: 8.24/10 (up to 5th Semester)

Technical Skills

Languages : Java, Python

Tools: VScode, GitHub, MS Excel,

Soft Skills: Communication, Adaptability, Problem-Solving

Projects

AI Document search (RAG chatbot)

- RAG chatbots retrieve relevant documents and generate answers from them. This makes responses more accurate and context-based.

Multi-Agent AI Data Science Assistant built using CrewAI.

- Developed a multi-agent AI Data Science Assistant using CrewAI and OpenAI APIs to automate data cleaning, exploratory analysis, visualization recommendations, and report generation.
- Implemented collaborative AI agents with specialized roles to perform end-to-end analysis on datasets and generate actionable insights.

Achievements

Published Indian Patent Application:

- Developed an AI-powered farm security system using YOLO and RT-DETR on NVIDIA Jetson Nano for real-time animal intrusion detection and classification.

- Implemented automated threat assessment with local edge inference, triggering alerts, deterrents, and SMS notifications for proactive crop protection.

International Hackathon 360° 3.0 – Finalist

- Developed *EcoTree Impact Analyzer*, a web-based carbon footprint and tree plantation planning platform that calculates CO₂ emissions using AQI, fuel consumption, and travel data. Contributed as a Developer in a team that advanced to the Final Round of the international-level hackathon by designing a scalable sustainability solution

Internship Experience

Web Development Intern | GeekBase Technology, Namakkal *Jan 2025 – Feb 2025*

- Developed responsive web pages using HTML, CSS, and JavaScript.
- Implemented front-end design principles and interactive UI components.
- Worked on website development and testing activities.

Data Science Intern | Training Trains Software Technologies & Institute *13 June 2025 – 28 June 2025*

- Learned and applied Data Science fundamentals including data preprocessing and visualization.
- Gained hands-on experience with Python and analytical tools.
- Participated in AI-based project development and model implementation.

Certifications

- Machine Learning – NPTEL
- Cloud Computing – NPTEL
- Python for Data Science – INFOSYS
